

Burton Mill Solutions acquires Menominee Saw & Supply

WOODLAND, WA AND MENOMINEE, MI. December 2, 2024 -- **Burton Mill Solutions** is excited to announce its acquisition of **Menominee Saw & Supply**, based in Menominee, Michigan. Menominee specializes in supporting wood processors in the Northern Great Lakes region and across the Midwest by supplying and reconditioning a variety of industrial cutting tools, including machine knives, small- and large-diameter circle saws, and wide and narrow band saws. This acquisition significantly expands Burton's geographic footprint and enhances its technical capabilities, enabling it to provide better service to primary wood producers. With the addition of Menominee, Burton strengthens its already comprehensive technical expertise in wood processing technology, including saws, knives, filing room equipment, technical services, and industrial wear parts.

Chuck Wert, Senior Vice President of Burton, commented, "We are excited to work more closely with the Menominee team. This partnership will allow us to elevate our service offerings and better address the needs of our customers in the Midwest."

John Brock, General Manager of Menominee, shared his thoughts, saying, "Burton has been important partner for many years, but by joining forces, we'll be able to significantly expand our network and capabilities. I can't wait to see what we accomplish together."

Dale Brown, CEO of Burton Mill Solutions and sister companies USNR and Mid-South Engineering, added, "this acquisition aligns perfectly with our mission to provide innovative solutions that enhance productivity and efficiency in the wood processing industry."

Menominee's Great Lakes location will complement Burton's existing network of saw and knife reconditioning service centers in Maine, South Carolina, Georgia, Alabama, and Louisiana.

About Burton Mill Solutions

Burton Mill Solutions is the leading North American manufacturer and supplier of industrial saw blades, machine knives, filing room equipment, cutting tool reconditioning services, and vocational training to the lumber, pulp, and wood biomass industries, with a history dating back to 1832. The Burton family includes industry leading brands like Simonds International, BGR Saws, The Knife Source, Wright Machine, Armstrong, and US Blades. Burton is further extended by sister companies USNR, a global leader in sawmill and panel machinery, and Mid-South Engineering, North America's oldest and largest professional engineering services firm exclusively serving the wood products industry. About Menominee Saw & Supply

Based in Menominee, Michigan, Menominee Saw & Supply specializes in designing, manufacturing, and reconditioning cutting tools and supplying a variety of related products to the primary and secondary wood products markets in the Northern Great Lakes region, and across the Midwest. Menominee was originally established in 1897 as an offshoot of the Wells Lumber Company, but has since expanded and diversified to become a regional leader helping sawmills and other wood processors across a large geography. With a focus on service, value, and quality, Menominee aims to be a trusted partner for wood processors seeking reliable and efficient cutting solutions.
